Faults:

Cart, profile, and logout buttons are non-functional, leading to a Whitelabel Error Page.

"Add to Cart" functionality is inactive.

Users can register multiple times but encounter login issues resulting in a Whitelabel Error Page.

Login errors display a Whitelabel Error Page instead of specific error messages.

The admin's homepage button results in a Whitelabel Error Page.

Admin logout directs to the user login page, inconsistent with other logout functions.

Logout outside the admin dashboard generates a Whitelabel Error Page.

Admin faces issues with category deletion, product updates, and customer deletion due to errors.

Missing Features:

Lack of a password visibility toggle for users.

Absence of character limits in input fields.

A search bar is missing from the interface.

Admin lacks the ability to delete customers.
